### SANPLAST.

## Sanplast

It was 1991, when the shower enclosures production started in Poland. Two brothers - the foundators of our company have done it - they dared to reach for their dreams. In this way Sanplast became a pioneer among of

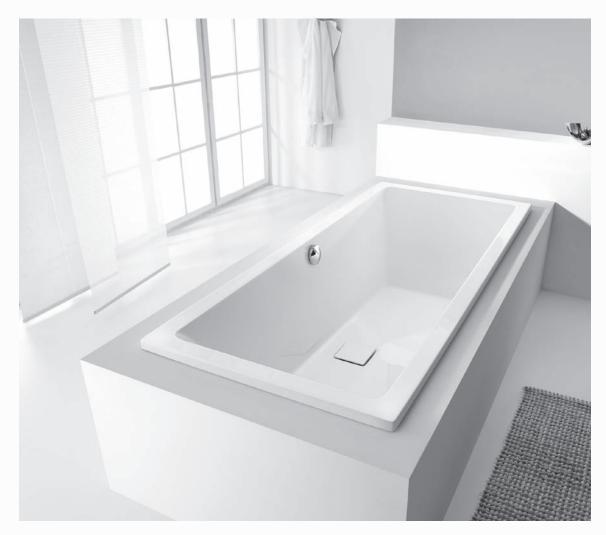

Polish manufacturers of bathroom equipment.

Over the years, we constantly expanded our range of high class shower enclosures, shower trays, bathtubs, shower panels, whirlpool systems and accessories.

Opening to the customers and listening to their needs - all these have

made Sanplast strengthened its position in the market, winning many awards and distinctions.

Today we are an expert in the bathing area and we constantly develope and look for new ways to provide our customers "pure pleasure" of bathing!

# Information about systems and technology

#### **Glass Protect**

Glass Protect it is the modification of the glass surface. Thanks to the maintenance of cleanliness of the shower enclosure is simple and cheaper. To maintain sufficient gentle cleaning which promotes ecology.

#### Sanitary acrylic

Sanplast shower trays and bathtubs are made of high quality sanitary acrylic. The material has non-skid covering properties which guarantees safety. Products of sanitary acrylic characterized by a perfectly smooth surface, so cleaning them is very easy. Acrylic is material dyed, thanks to features that may occur during use, easy to remove by polishing. Thanks to the physical properties, sanitary acrylic perfectly retains heat.

#### Mineral cast

Shower trays and washbasins made of mineral cast have outstanding properties mechanical and chemical. Ultra-smooth, non-porous surface makes it easier to maintain purity eliminates the development of dangerous bacteria, which is particularly important in areas with high humidity. The undoubted advantage of the mineral cast is resistant to stains and discoloration. All the dirt is easy to remove using gentle detergents. This material is extremely durable, resistant to abrasion, making trays retain their original appearance for a long period of time.

#### **Pro Safe System**

Pro Safe System is a special non-slip surface permanently applied to the surface of the acrylic or mineral cast shower trays. It provides the maximum safety and comfort of the bath. Banners aesthetic pattern of the fine texture creates a new visual effect in the bathroom. Non-slip surface is flat, making it easier to keep shower tray clean. The bath becomes even more enjoyable and safe for the user.
