Quality and Environment Policy

BLB- Indústrias Metalúrgicas, SA is dedicated to the production and commercialisation of bathtubs, shower trays, wash basins and panels of vitreous enamel steel and and several sanitary accessories.

BLB has always developed this activity with the purpose of supplying products of high quality while continuously improving its environmental performance.

Today BLB integrates sustainability as a fundamental value of the Company's position.

In this context BLB is therefore committed to:

1. Manage its resources in order to guarantee the adequate technological development, offering a more cost effective and optimised productivity with the aim achieving the levels of intended growth and integrating the variable sustainability in order to meet the needs of modern society without compromising future resources.
2. Satisfy the customer requirements and expectations.
3. Adopt the principles of continuous improvement of the various levels of the Quality and Environment Managing System in order to improve performance.
4. Promote the personal and professional development of its collaborators encouraging initiative spirit, team work, innovation, improvement and environmental awareness.
5. Minimize the environmental impacts deriving from its activity, particularly those associated with the consumption of raw materials and energy, and the production of dangerous waste, adopting for the purpose sustainable practices in production processes and in the design and development of new products.
6. Assume the Reduction, Reuse an Recycling of waste and use of natural resources as inseparable elements of daily activities.
7. Keep betting on new technologies which allow environment protection preventing pollution resulting from its activity, whenever suitable and economically viable.
8. Comply with all legal requirements applicable to its products and environmental aspects, including other requirements that might be subscribed having in mind interested parties expectations.
9. Encourage our suppliers to develop products that satisfy demands regarding levels of product quality and environmental requirements.
