TECHNICAL PORCELAIN / TECHNISCHES FEINSTEINZEUG

Technical porcelain is the perfect type of ceramic material, it presents the ceramics of future. It has some design limitations, but the excellent technical characteristics. During the production of this type of product the pattern is created by pressing the spray-dried powders, previously colored with natural agents, into solid mass by powerful hydraulic presses. Thus, we produce the stone-like material with more intense characteristics of water absorption and strength. The material can be applied to any area and has no practical limitations. Besides, PEI index is not applied to here, because the pattern won't be erased or destroyed.

Technisches Feinsteinzeug ist die perfekte Art des keramischen Materials, es ist die Keramik der Zukunft. Es hat einige Design-Einschränkungen, aber ausgezeichnete technische Eigenschaften. Bei der Herstellung dieser Art von Produkt wird das Muster durch Einpressen des getrockneten Pulver erzeugt, das vorher mit natürlichen Farbstoffen verarbeitet wurde und dann zu einem Monolith durch leistungsstarke Hydraulikpressen eingepresst. So produzieren wir das steinähnliche Material, allerdings mit intensiveren Eigenschaften was Wasserabsorption sowie Festigkeit angeht, dem in den Anwendungsbereichen keine Grenzen gesetzt sind. Der PEI-Indikator für diese Art von Feinsteinzeug wird nicht angewendet, da das Muster abriebfest ist.

TECHNICAL+DIGITAL PORCELAIN

Decorated - a new type of porcelain, has appeared recently, thanks to the development of digital printing technologies. It has a design limitation but "decent" technical properties. During the production of this type of porcelain engobe is not used. This allows us to decorate the technical porcelain. This type of product is closer in its properties to the technical porcelain. Digital print is applied directly to the body is protected by a special type of protection. This makes the design more resistant to destruction.

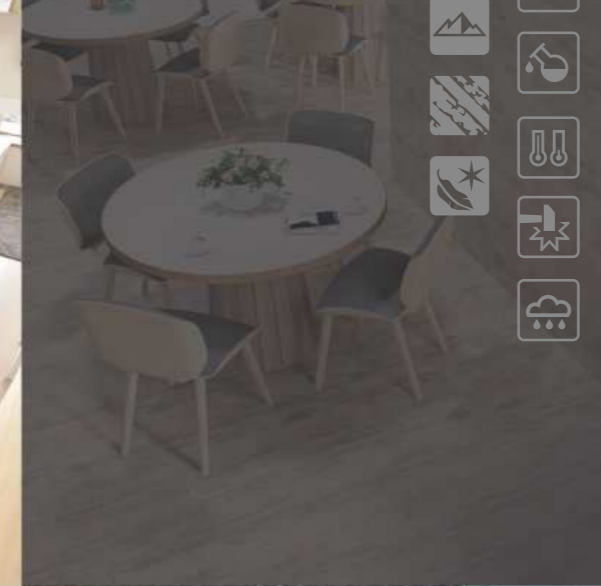

DEKORIERTES FEINSTEINZEUG

Dekoriertes Feinsteinzeug: eine neue Art vom keramischen Granit, ist vor kurzem dank der Entwicklung der Digitalprint -Technologie erschienen. Trotz einiger Design-Einschränkungen, hat es ausgezeichnete technische Eigenschaften. Bei der Herstellung dieses Produktes verwendet man keine Engobe (Grundierung), was erlaubt, den technischen Granit zu dekorieren. Das heißt, dass dieses Produkt nach seiner Eigenschaft dem technischen näher ist. Das Muster wird mittels Digitaldruckmaschine direkt auf den Fliesenkörper aufgetragen und durch spezielle Protektion geschützt. Das macht das Produkt widerstandsfähiger.

TECHNOLOGY "LUSTR" **DECOR • PANEL**

EINBRENNTECHNOLOGIE MIT PERLÜBERLAUF **DECOR • PANEL**

Exclusive production of panels for designer's solutions for application to the facades and interior finishing. Your individual image can be digitally printed upon the surface of porcelain tiles and match the size of facade, wall or floor. This product has been duly certified and complies with the related technical standards.

Sonderanfertigungen von Paneelen für Fassaden und Innenräume nach individueller Bestellung möglich. Die von Ihnen gewünschten Bilder, werden auf die Feinsteinzeug Fliesen übertragen und an das Format der Fassade, der Wand oder des Bodens angepasst. Dieses Produkt ist zertifiziert und entspricht den technischen Standards.

TECHNICAL DATA (SPECIFICATIONS) FOR TECHNICAL PORCELAIN «PRO»

TECHNICAL CHARACTERISTICS	Unitt	PRO Standard	Actual Testing Results	Regulating Document	Index Meaning
WATER ABSORPTION	%	no more 0,5	0-0,3	TU 5752-51147644-2014	The less Index, the more durable tiles, when operating in conditions with changeable climate
MODULUS OF RAPTURE	Mpa	not less than 45	50 + - 3	TU 5752-51147644-2014	Indicates Max capacity to withstand, incl. the wind load for the ventilated facades
PEI	degree	3-4	3-4	TU 5752-51147644-2014	Responsible for the print durability during the tiles' exploitation
RESISTANCE TO THERMAL SHOCK	cycles	not less than 10	11	TU 5752-51147644-2014	Ability of a tile to maintain differences of high temperatures
FROST RESISTANCE	cycles	not less than 150	more 200	TU 5752-51147644-2014	Ability of a tile to maintain differences of low temperatures
SURFACE HARDNESS ACCORDING TO THE MOHS SCALE	<small>conventional units (hardness of minerals)</small>	not less than 5	5-6	TU 5752-51147644-2014	The higher this Index, the more stable tile to scratches.
STAIN RESISTANCE	class	4	4	TU 5752-51147644-2014	The ability of the tiles do not absorb aggressive liquids (coffee, tea, oil, iodine, etc.)
FIRE RESISTANCE CLASS	class	KO	KO	GOST 31251-08	The Indicator characterizing a tile as not fire-dangerous
SPECIFIC EFFICIENCY OF RADIONUKLEID (RADIOLOGICAL HAZARD CLASS)	Bq/kg	no more 370	no more 206	expert opinion	Tiles are radiation safe and can be recommended for using in medical institutions
MODULUS OF RAPTURE LIMIT AFTER THE FROST RESISTANCE TEST	Mpa	not less than 25	30 + - 3	TU 5752-51147644-2014	An important Strength Indicator after numerous temperature changes
MARKER RESISTANCE	class	3	3	factory method	Ability of the surface to not to absorb alcohol dyed fluids
RESISTANCE TO ABRASION MATERIALS (ABRASIVE PAPER)	degree	3	3	factory method	Surface resistance to mechanical damage from metal, stone, another tile

The term 'professional quality' is a description that is rarely found in the field of ceramic tiles. We are perhaps more accustomed to this type of terminology when describing for example a drilling tool. We all know that a 'simple' drill means a tool for private use, while there are many types of drills intended for 'professional' use by the builders. However, the term 'professional quality', can be applied to ceramic tiles as well. Ceramic tiles referring to the 'amateur' range are designed exclusively for private households, while the 'professionally made' products have practically no restrictions in their fields of application. These tiles of professional quality comply with the highest requirements for water absorption and resistance to stains and scratches, and the surface does not deteriorate in places with high human traffic. These products are available in various sizes and surface applications, that enables them to match any unique interior design)

TECHNISCHE CHARAKTERISTIKEN DES FEINSTEINZEUGES "PRO"

TECHNISCHE CHARAKTERISTIKEN	Einheit	PRO Standard	Testergebnisse	Nachweis	Index Bedeutung
WASSERABSORPTION	%	maximal 0,5	0-0,3	TU 5752-51147644-2014	Je niedriger die Einheit, desto höher die Nutzungsdauer bei verschiedenen Klimabedingungen
BIEGEZUGFESTIGKEIT	Mpa	mindestens 45	50 + - 3	TU 5752-51147644-2014	Die Angabe steht in direkter Verbindung mit maximaler Belastbarkeit inkl. Windeinflüsse bei vorgehängten/hinterlüfteten Fassaden

HÄRTEGRAD NACH MOHS HÄRTESKALA	Mineralien Härte	mindestens 5	5-6	TU 5752-51147644-2014	Je höher die Angabe, desto widerstandsfähiger ist Fliese gegen Abrieb
BESTÄNDIGKEIT ZUR VERSCHMUTZUNG	klasse	4	4	TU 5752-51147644-2014	Widerstandsfähigkeit der Fliese gegen Eindringen von aggressiven Flüssigkeiten (z.B. Kaffee, Tee, Öl, Jod usw.)
FEUERBESTÄNDIGKEIT, KLASSE	klasse	KO	KO	GOST 31251-08	Entflammbarkeitsklasse
RADIOAKTIVE GEFÄHRDUNGSKLASSE	Bq/kg	maximal 370	maximal 206	Zeugnis	Niedrige Radioaktivität, kann für die Verlegung in medizinischen Einrichtungen empfohlen werden
BIEGEZUGFESTIGKEIT BEI FROSTBEDINGUNGEN	Mpa	mindestens 25	30 + - 3	TU 5752-51147644-2014	Wichtiger Härte-Index nach mehrmaligen Temperaturschwankungen
MARKER RESISTENZ	klasse	3	3	Herstellungsmethode	Widerstandsfähigkeit der Fliese gegen Eindringen von gefärbten alkoholhaltigen Flüssigkeiten
RESISTENZ ZU ABRASION (Z.B SCHLEIFPAPIER)	stufe	3	3	Herstellungsmethode	Resistenz der Oberfläche gegen Beschädigung durch Metalle, Steine und Fliesen

TECHNICAL + DIGITAL PORCELAIN

The term "Professional Quality" is a type of characteristics
to be rarely found in the field of ceramic tiles.

We used to apply more ordinary term in order to, let's say, describe the drilling tools.
We all know that a simple drill means a tool for private use, we buy it to take it home;
while there are so many types of drills intended for professional use by the builders.
However, this term, i.e. "professional quality", can be applied to the ceramic tiles as well.
Ceramic tiles of "amateur" range are designed exclusively for finishing the private housing,
while the professionally-made products have no limitations in their fields of application.
Professionally-made tiles comply with the increased requirements for water absorption,
stain resistance, resistance to scratches, their surface design
would not deteriorate in places with high foot traffic.
Such products are available in various sizes, surface treatment types,
so that to match any unique interior design.
We offer you the catalogue with the products of "professional quality" range.

„Professionelle Qualität“ ist ein Begriff, der nur selten zur Charakterisierung von Keramikfliesen
verwendet wird. Es ist üblicher, solche Begriffe zum Beispiel für Werkzeug zu verwenden.
Wir alle wissen, dass es sowohl das Werkzeug für die Heimwerker,
als auch professionelle, für Industrie gibt.
Der Begriff „professionelle Qualität“ kann auch bei Keramikfliesen angewendet werden.
Standard Keramikfliesen werden ausschließlich für die Veredelung der privaten Haushalte
verwendet, professionelle wiederum haben keine Einschränkungen in den Anwendungsbereichen.
Professionelle Fliesen zeichnen sich durch erhöhte Anforderungen an Wasseraufnahme,
Verschmutzungsresistenz, Kratzschutz und Verschleißfestigkeit aus.
Geeignet für stark beanspruchte Bereiche.
Solche Produkte werden in verschiedenen Größen und Arten von Oberflächen
produziert um einzigartige Interieurs entwerfen zu können.
Dieser Katalog präsentiert Produkte ausschließlich „Professioneller Qualität“
