

The Laminate Worlds of **CLASSEN**

Fast. Easy.  
Megaloc.

**CLASSEN**<sup>®</sup> FLOORING

## **CLASSEN** megaloc is unique

megaloc is new. megaloc is unique. megaloc is certainly the world's fastest and easiest installation system. Laying your **CLASSEN** laminate flooring will be child's play with this latest glue-free installation system. The roof tile principle of installation means that a special locking mechanism on the short side is superfluous.

### Select laminate flooring quick and easy to lay

Simply place the board in the groove of the previously laid row. As it is lowered, the laminate floorboard will be locked in with the previously installed board. Finally, just press your thumb quickly on the cross bevel and it's ready!

## Premium World – the big extravaganza

The best days of our lives – wedding, trip to the opera, fancy clothes – and to match this **CLASSEN** *Premium World* provides the ample array of a high-end collection.

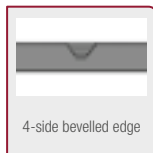

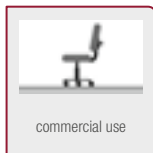

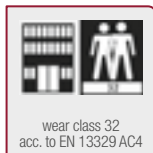

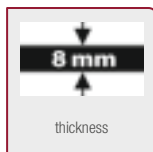

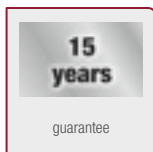

The 6 inch wide typical format of a classical floor board experiences a renaissance in the **CLASSEN** *Premium Word*.

The surrounding chamfer underscores the natural look of a traditional floor board after it is installed. The colour interaction of the six inch flooring has a remarkable affect due to the matt structure of its surface.

## **CLASSEN** branded laminate floorings are low emission.

From the transportation of raw materials through to dispatch, the entire production process is carried out at the integrated production site in Mark Brandenburg with its enormous forests. Short transportation routes of the raw wood material to the laminate factory, low-emission production technologies, the use of waste wood in our own biomass heat plant and the reintroduction of such to the production circuit: This is a resource-gentle, sustainable method of management which begins with forestry management.

The production of laminate flooring at the MDF and laminate factories Baruth

## The sustainable resource cycle

We guarantee that no imported tropical wood is used in the manufacturing of **CLASSEN** laminate flooring.

**CLASSEN** laminate flooring is solely based on PEFC-certified wood and domestic wood from sustainable forest management, which is highly compressed to become real **CLASSEN** HDF board.

low-emission product

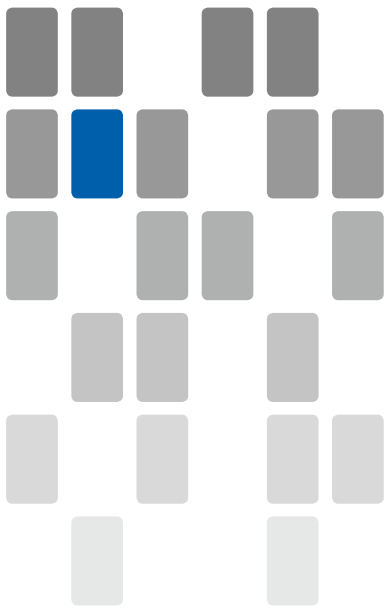

Promoting  
Sustainable Forest  
Management

[www.pefc.org](http://www.pefc.org)

Surrounded by giant forests, Fiberboard GmbH's MDF factory is located in the centre of the Brandenburg marches and adjacent to the directly connected laminate factory that belongs to **CLASSEN** Industries GmbH. This forms part of a concept to establish an integrated site. Back in the days when the company was selecting a site, 'sustainability' was a main issue. In addition to being near to suppliers, immediate proximity to wood (as a raw material) was a key criterion in settling for the site. Today, the **CLASSEN** integrated site concept benefits from sustainably managed wood that is grown in the nearby forests of Brandenburg. This enables laminate production that is both resource-friendly and low in emissions.

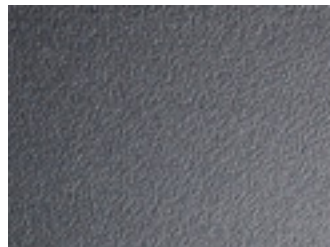

## Surface technology

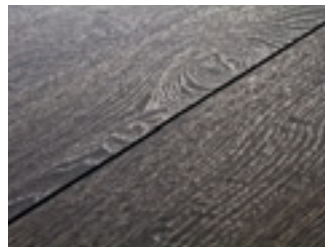

# From micro-pore to chrome-like surface structures

Thanks to special technologies used during the treatment of laminate décors with unusual surface structures, **CLASSEN** demonstrates outstanding product competence.

Starting with smooth surfaces without any structure via floors with super-matt surface structure or with the haptics of an oiled floor, nine structure variants are set out:

*Rough*

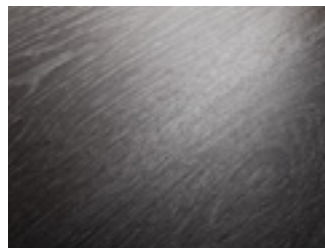

*Chrome*

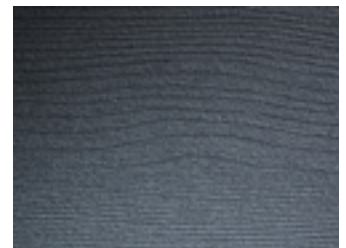

*Micro-pore*

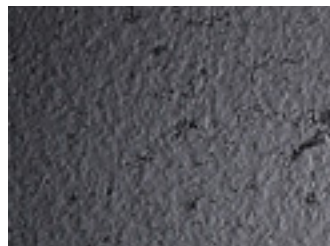

*Handscraped*

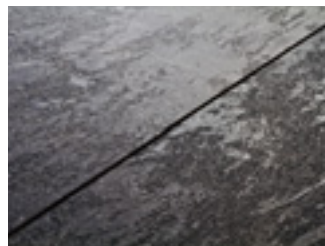

*Authentic pore*

*Matt structure*

*Metal*

*Sand structure*

*Synchronous pore*

*Rough and micro-pore surfaces can mainly be found among the entry-level variants. Tangible micro-structure or matt structures supplement the series of surface variants. Synchronous structure, hand-scraped surface or high-polished pores*

*form the next level of high-quality sensitive surface treatment. Leather and cast iron as well as stone, slate and varnish are among the unusual special structures and are further proof of the excellent CLASSEN surface expertise.*

## Ranges

# Decors, designs, formats

The following format variants are currently available:

*XXL long board format in the dimensions 2,175 mm length x 243 mm width*

NEW

*XL big board format in the dimensions 1,286 mm length x 243 mm width*

*XL big board format in the dimensions 1,286 mm length x 282 mm width*

*Standard board format in the dimensions 1,286 mm length x 194 mm width*

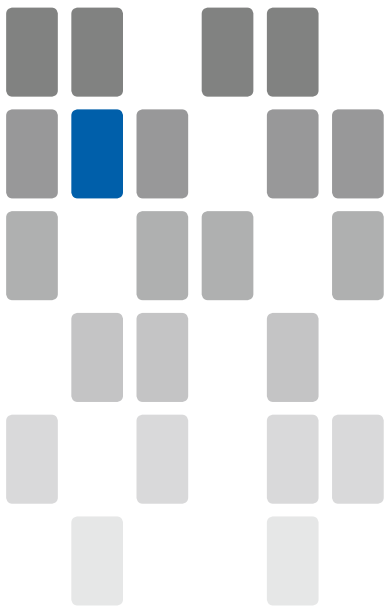

*Narrow board format in the dimensions 1,286 mm length x 160 mm width*

*30/60-laminate tile in the dimensions 605 mm length x 282 mm width*

The **CLASSEN** Group is one of the world's leading manufacturers of laminate flooring. There is hardly another manufacturer who can offer one-stop shopping for such a depth and breadth of hard floor coverings. As a specialist for laminate floor coverings in the widest sense, the **CLASSEN** Group also produces laminated floor coverings as *D-sign* by **CLASSEN**.

The **CLASSEN** Group offers its customers the possibility of putting together a tailor-made range of almost 400 décors, twelve different surface variants and six format variants.

megaloc

## Surely the quickest and simplest installation system in the world

**CLASSEN megaloc** was developed and optimised for the easy installation of laminate flooring. This is where the installation concept with the lock clip system proves its superiority.

Try **CLASSEN megaloc** for yourself. You will discover: This way laying floors is fun.

## CLASSEN megaloc ...

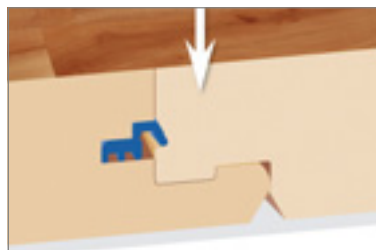

- During the installation, ISOWAXX seeps into the connecting joint and automatically seals it.
- For optimal protection from water ingress from above.

### position ...

Simply place the long profile of the new panel in the previously installed row and lower to connect to the new row.

### click ...

A short push with the thumbs on the short profile and the panel locks into place with an audible click.

... finished!

super easy, super fast and super strong

low-emission product
